4. Performance Improvements

Removed Heavy 3D Components

- **Globe.tsx (Canvas2D)** - Interactive dotted earth with UAE emirate nodes, animated arcs, hover tooltips. Required continuous canvas rendering, caused renderer freezes on mobile.
- **InfiniteGallery.tsx (react-three-fiber)** - 3D carpet gallery with WebGL rendering. Used Three.js with mesh mutations, DPR caps, geometry allocations. Major memory and CPU consumer.
- **lazy.tsx** - Dynamic imports for Globe and InfiniteGallery no longer needed.
- **RequestCall.tsx** - Removed from Nav (still available if needed elsewhere).

These components were the primary cause of the site's performance issues: slow initial load, high CPU usage, renderer freezes, and poor Core Web Vitals scores. The new design uses static images and CSS-only animations for a dramatically faster experience.

5. New Homepage Structure

Hero Section: White bg. Badge 'Rated 4.9/5 by 500+ Customers'. Gradient h1 heading. Dual CTAs (coral Get Free Quote + teal Call Now). Trust badges row. Hero image.

Trust Strip: Cream bg (#FFF7ED). 4 trust points: Same Day Service, Eco-Friendly, 7 Emirates, Satisfaction Guaranteed.

Stats Bar: Teal gradient bg. 3 big stats in white: 7 Emirates Covered, 2-4hr Dry Time, 500+ Happy Customers.

Services Grid: White bg. 6 service cards with cycling colored top borders (teal/coral/purple/green). Each shows icon, name, description, AED pricing.

Before/After: Cream bg. Side-by-side comparison panels with diamond divider icon.

Why Choose Us: Lavender bg (#F5F3FF). 3 trust pillars: Transparent Pricing, Certified Professionals, Eco-Friendly Products.

Coverage: Mint bg (#ECFDF5). 7 emirate cards with images, response times, area counts. Links to /locations/{slug}.

FAQ: Cream bg. 5 accordion questions with details/summary. FAQPage schema for SEO.

CTA: White bg. Final call-to-action with WhatsApp and phone buttons.

Footer: Dark gradient (navy to purple). 4-column layout with links, contact info, copyright.
